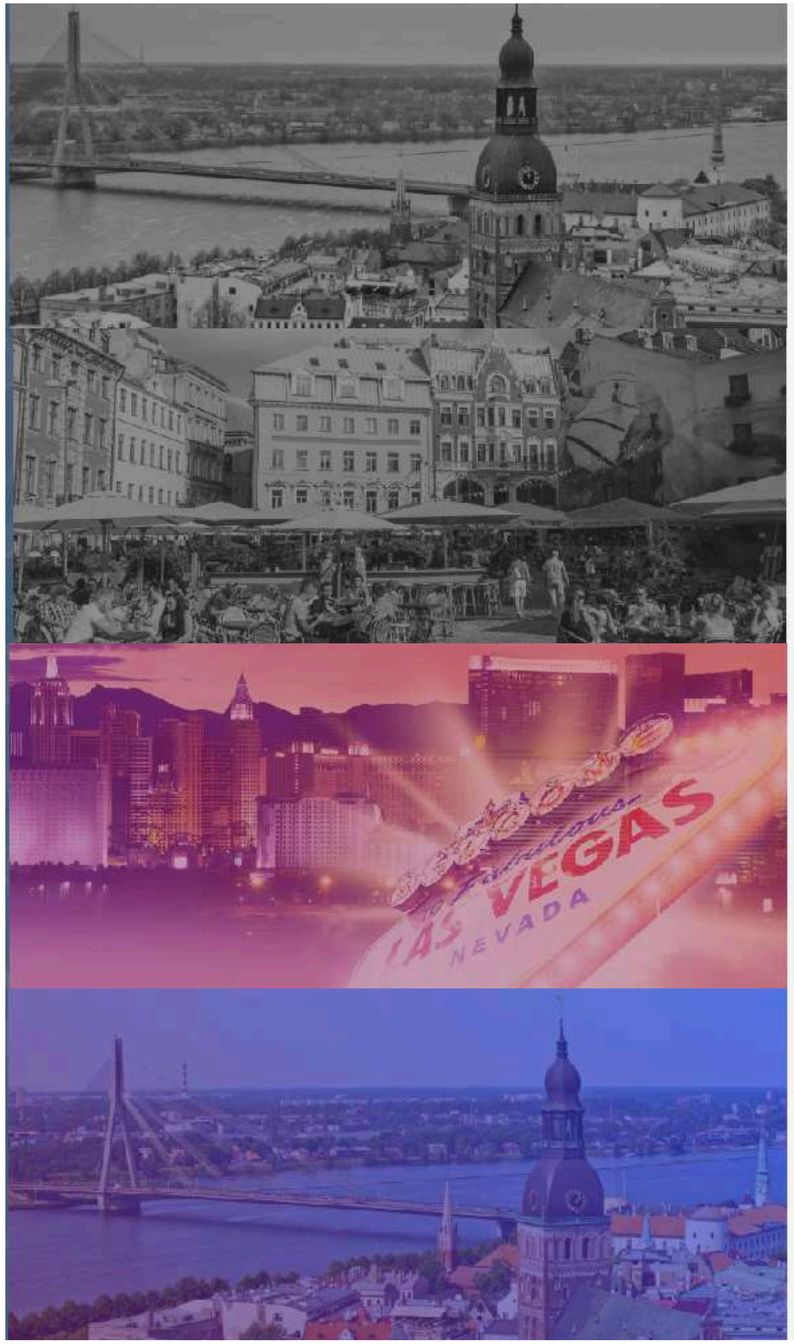
Remote Community Day 2020

Raimonds Simanovskis

Raimonds Simanovskis

Founder & CEO



May 25–26, 2017 / Riga, Latvia

eazyBI Community Days 2017

The fist-ever eazyBI Community Days 2017 will take place in Riga, Latvia. If you want to make the most out of the eazyBI, you just have to be there.

May 24–25, 2018 / Riga, Latvia

eazyBI Community Days 2018

The second eazyBI Community Days 2018 will take place in Riga, Latvia. If you want to make the most out of the eazyBI, you just have to be there.

April 12, 2019 /

eazyBI Community Day | Las Vegas

Join us for an eazyBI Community Day in Las Vegas, USA on April 12, 2019. Participate in this "once in a year" eazyBI event to learn more about eazyBI, get inspired, and share your experience and ideas with others.

May 16–17, 2019 / Riga, Latvia

eazyBI Community Days | RIGA

The eazyBI Community Days 2019 will take place in Riga, Latvia on May 16-17, 2019. This is your chance to learn more about eazyBI, get inspiration and new ideas, share your experience with others, and have some fun.

eazyBI Remote Community Day 2020

Agenda

8:00 PDT | 11:00 EDT	**Opening Keynote: Latest eazyBI Features & Future Plans**	Raimonds Simanovskis
8:30 PDT | 11:30 EDT	**eazyBI + Confluence: The First Date**	Zane Baranovska, Martins Vanags
9:00 PDT | 12:00 EDT	**30-min Break**	
9:30 PDT | 12:30 EDT	**Jira Admin's Journey to eazyBI**	Gerda Zandersone
10:00 PDT | 13:00 EDT	**How to Create Smart Reports Without MDX**	Ilze Leite-Apine
10:30 PDT | 13:30 EDT	**Behind Complex Filters**	Daina Tupule
11:00 PDT | 14:00 EDT	**30-min Break**	
11:30 PDT | 14:30 EDT	**Things to Know About the Burn-Down Chart**	Janis Plume
12:00 PDT | 15:00 EDT	**Don't Make Me Think About UI**	Janis Liepa
12:20 PDT | 15:20 EDT	**Managing a Remote Team: eazyBI Experience**	Raimonds Simanovskis, Ilze Leite-Apine
13:00 PDT | 16:00 EDT	**Wrap Up & Closing**

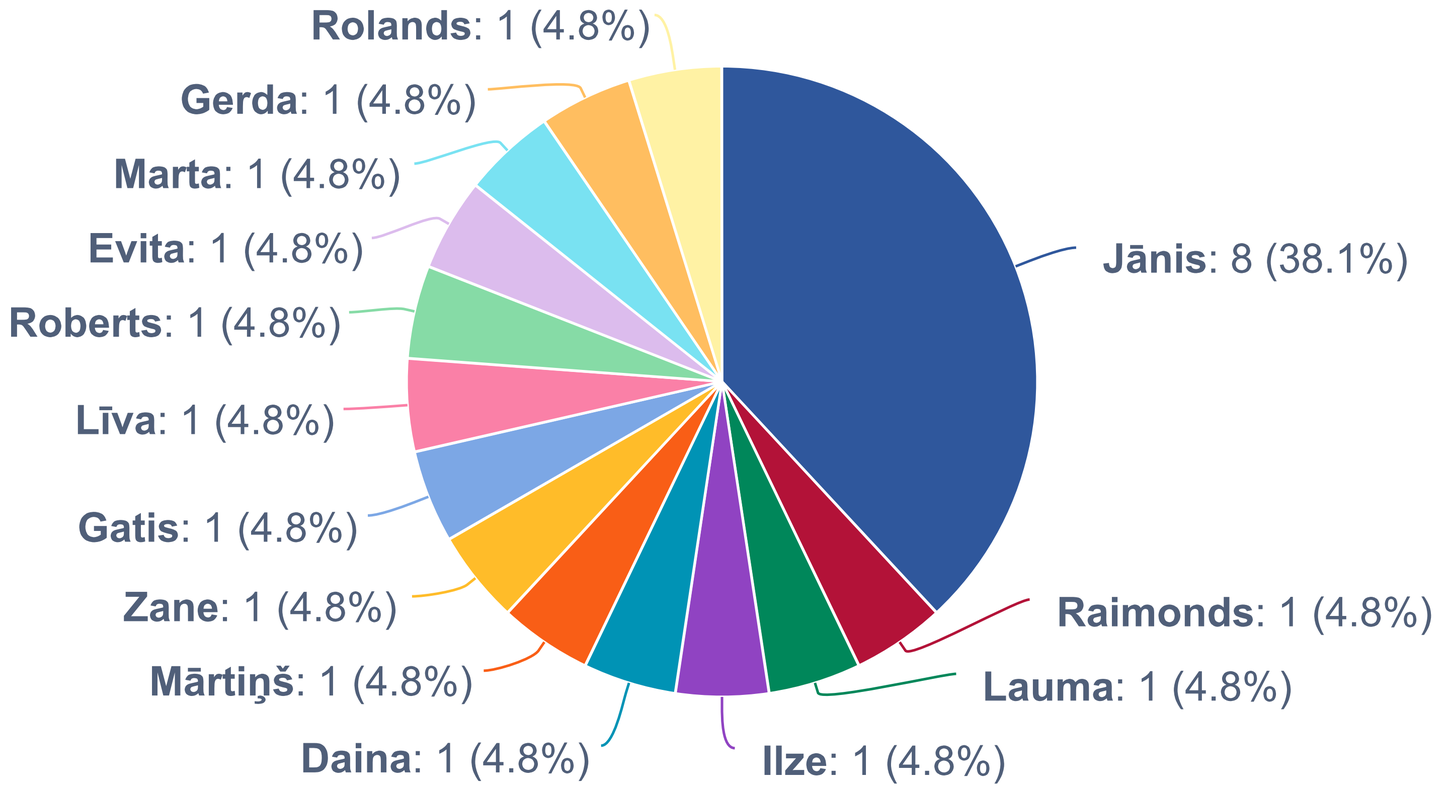
Team Names 2020



Latest Features

5.3.2 / Released Mar 05, 2020

Fixed in this release:

- Fixed Gantt chart export to PDF.
- Fixed DevOps mean time calculated measures formules.
- Fixed import of Portfolio Team only as a property after eazyBI upgrade.
- Fixed Xray test executions import.
- Fixed eazyBI upgrade on Jira Data Center if the cluster nodes table had duplicate records.

5.3.1 / Released Mar 02, 2020

Fixed in this release:

- Fixed sprints import when a board of a sprint is deleted.
- Fixed group picker custom field dimension import.
- Fixed import of Portfolio Team only as a property.
- Fixed Xray import when test hierarchies are disabled.
- Fixed drill into DevOps pull request measures when using Oracle.
- Fixed showing of the Troubleshooting page when the child process is not working correctly.

5.3.0 / Released Feb 24, 2020

New in this release:

- **Drill into a single measure by another dimension level** (and leave other measures at the summary level).
- **Gantt chart weekly, quarterly,** and **yearly** views.
- Improved **Freeze header** functionality when doing **horizontal scrolling** of wide tables.
- Add custom **multi-weekly hierarchies** in the **Time dimension**.
- Show **stacked bars** or **areas** using **relative percentage** also in **timeline charts**.
- **ATM** dimensions and measures are renamed to the new **TM4J** (Adaptavist Test Management for Jira) prefix and naming conventions.
- **Export** and **import definition** of **Jira import options** in Source Data.
- **Do not allow empty** or **delete a cube** while a data **import is in progress**.
- Specify "sslmode" for PostgreSQL database connection in advanced database settings.
- New **Database migrator** options for exporting and importing the eazyBI database using files as well as **eazyBI for Jira Server data migration to Jira Cloud**.

Fixed in this release:

- Fixed search of issues by summary in other Issue dimension hierarchies.
- Fixed expansions of visible measure groups when filtering by name is used.
- Fixed DateAddDays and DateAddWorkdays to work correctly with daylight saving time changes and additional non-working days.
- Fixed drill through DevOps pull request measures.
- Fixed drill into chart values in some specific scenarios.
- Fixed drill into worklogs from aggregate calculated members.
- Fixed rendering of bar charts with grouped labels.
- Fixed positioning of data points when zooming into bar charts with date ranges.
- Show selected member Display names when exporting results to Excel or CSV.
- Improved performance of boards and sprints import using Java APIs instead of REST APIs.
- Improved issue subtask import performance.
- Fixed incremental import status storing if some import step fails.
- Fixed import of identical user display names in User picker custom fields.
- Fixed DevOps Bamboo data import caused by REST API pagination bugs.
- Fixed DevOps Bitbucket data import when branch didn't have any commits.
- Fixed subtasks Tempo hours import during an incremental import.
- Fixed Profields import for some specific project keys.
- Several TM4J import bug and performance fixes.
- Fixed source file uploads on some file system setups.
- Rename a measure in source file data mapping if it is renamed in the Analyze tab.
- Fixed MS SQL Server connection when using Windows authentication.
- Added eazybi-child.out log file rotation to avoid too large log files.
- Do not add a duplicate atlassian.xsrf.token cookie.
- Fixed eazyBI account deletion when using Oracle which could cause data deletion in other accounts.
- Fixed Troubleshooting info about the child process when using Java 11.

5.2.1 / Released Nov 26, 2019

Fixed in this release:

- Fixed connection to PostgreSQL using SSL.
- Fixed getting of operating system memory parameters when using Java 11.

5.2.0 / Released Nov 25, 2019

New in this release:

- Show **stacked bar** or **area charts** using **relative percentage** instead of values.
- Show **drilled into member names** in bar and line **charts**.
- Add a **vertical line** in **bar** and **line charts** (similar to previous functionality in timeline charts).
- **Search** and **filter** members by name in **additional hierarchies** (e.g. in Issue dimension Sub-task or Epic hierarchies).
- **Google Sheets** import is migrated to the latest Google Sheets API v4.
  ⚠ Please enable both Google Drive and Google Sheets API in Google API console and re-authenticate Google Sheets import.
- **Xray data import performance** improvements, added a measure "Xray Test Executions created".

Fixed in this release:

- Fixed overlapping of label names in some charts.
- Export to Excel cell formatting for empty cells.
- Show the page break option in dashboard editing when PDF export is not configured (as it can be also used for wallboards).
- Improved Jira data import performance for a large number of issues.
- Do not trigger a full data import if a sprint start date is changed.
- Validate before DevOps import that at least one Bitbucket or Bamboo role is selected.
- Fixed DevOps import of deployments without a version.
- Fixed Zephyr Test Cycle started date time zone conversion.
- Fixed Zephyr data import when using MS SQL Server.
- Limit console.log output to 1000 lines in custom JavaScript (to avoid too large accidental debug logging during data import).
- Fixed adding of an account user with a data access role.
- Fixed HTML escaping of data access role names.
- Fixed database error handling when non-English error messages are returned.
- Fixed saving of eazyBI database passwords with specific character sequences.
- Upgraded PostgreSQL JDBC driver to the latest version.

5.1.1 / Released Oct 28, 2019

Fixed in this release:

- Fixed DevOps metrics import (when a Bitbucket pull request didn't include any Jira issues, or when a Bamboo build didn't have a start date).
- Improved Jira incremental import performance when a Sprint field is selected.
- Do not allow saving of a data access role before member details are loaded.
- Fixed import of large Profields multi-line text field values.

5.1.0 / Released Oct 24, 2019

New in this release:

- **DevOps metrics** import from BitBucket pull requests and Bamboo builds.
- Predefined Time dimension calculated members – **Current month, Previous month, Last 12 months, Last 30 days, Last 4 weeks**.

  ⚠ If there are existing user defined Time dimension calculated members with these names then they will be overwritten with new predefined formulas.

  A new MDX function DateMembersBetween is used in these formulas.

- Highlight individual chart series on a mouse hover.
- Support for Tempo Teams version 6.5.
- Several Xray import improvements.
- Support additional data import for ATM Test Case and ATM Test Run dimensions.
- nFeed is renamed to Elements Connect.
- Close idle connections in the database connection pool (which avoids problems with firewalls that close inactive connections).

Fixed in this release:

- Fixed wrapping of long axis titles.
- Fixed handling of empty values in a stacked area chart.
- Fixed positioning of a frozen table header.
- Better detection of mobile devices.
- Custom imported properties now appear in the User defined measures group.
- Fixed regular import log line prefixes in eazybi-queues.log.
- Improved memory usage for large Jira data import.
- Several Adaptavist Test Management data import fixes.
- Several Zephyr data import fixes.
- Several Xray data import fixes.
- Several Data access roles fixes.
- Fixed trusted local base URL detection if proxyPort is specified without proxyName.
- Remove duplicate X-XSS-Protection header for Jira 7.6 or later versions.

eazyBI 5.1 Features Highlights

- DevOps metrics from Bitbucket pull requests,

  Bamboo builds, Jira incidents
- Predefined Time dimension calculated members

  Current month, Last 12 months, Last 30 days, ...
- Charts library update, highlight chart series on mouse hover

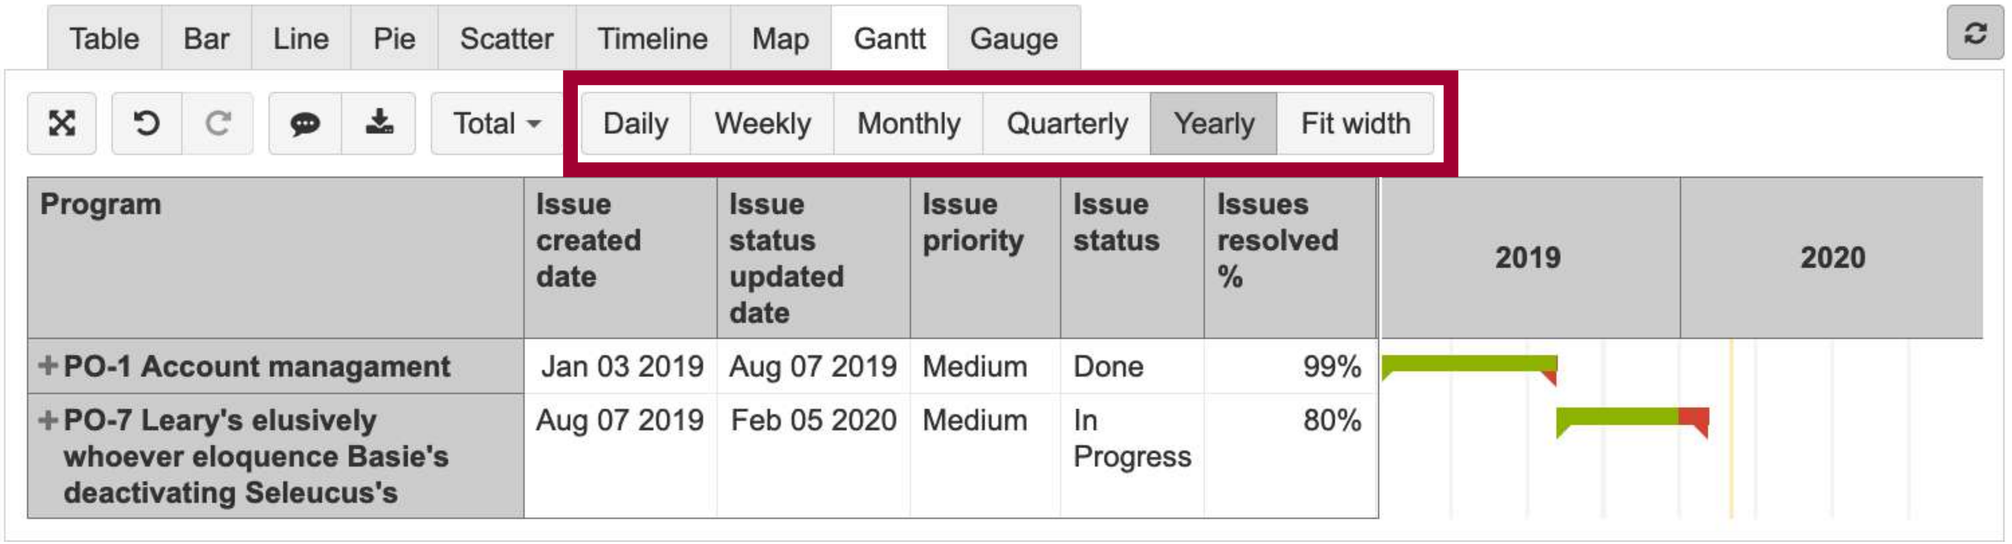
eazyBI 5.3 Features Highlights

- Drill into a single measure by another dimension
- Gantt chart weekly, quarterly, and yearly views
- Custom multi-weekly hierarchies
- Database migrator
  - From server to server using files
  - Jira Server to Jira Cloud migrator

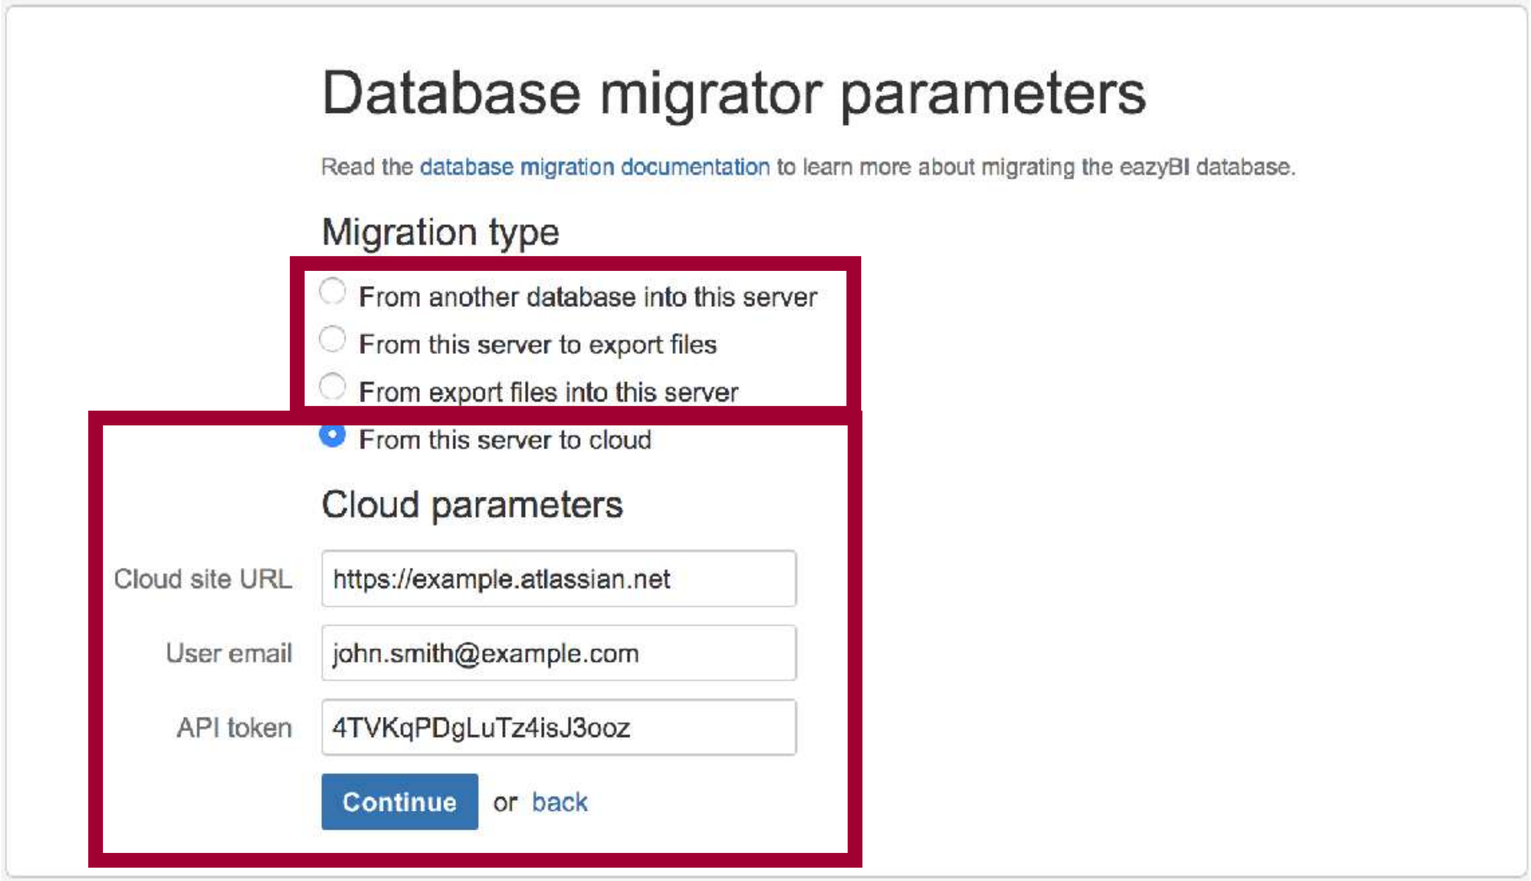
Drill Into a Single Measure

	Issues created	Issues resolved	Issues due					
			− All Priorities	Highest	High	Medium	Low	Lowest
+ DEMO Alfa	195	181	14	4	1	5	1	3
+ DEMO Beta	193	173	20	5	2	2	7	4
+ DEMO Gamma	195	176	19	3	3	3	7	3

Gantt Chart Views



Database Migrator

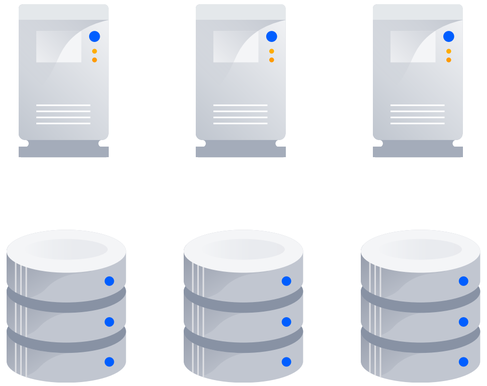


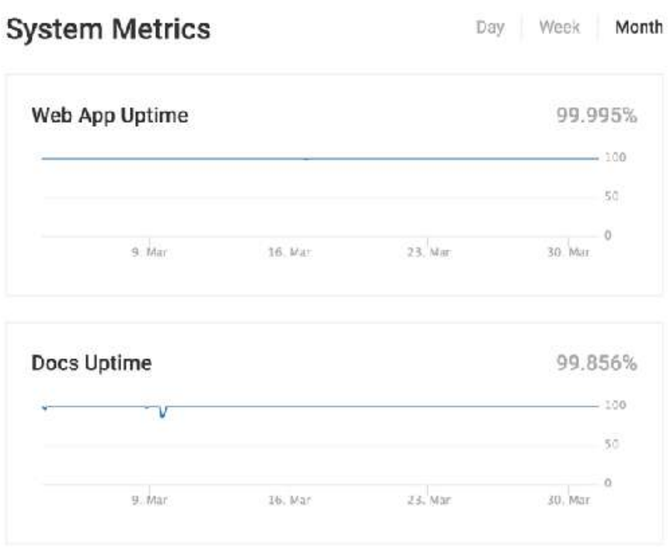
eazyBI for Jira Cloud

- Next-gen projects reporting
  - Project specific issue types, statuses, custom fields
  - Story point estimate, Epics
- Tempo Cloud Planned hours
- Xray Test Management Cloud

Cloud Infrastructure & Security

Google Cloud





ATLASSIAN

Cloud Security Program

bugcrowd

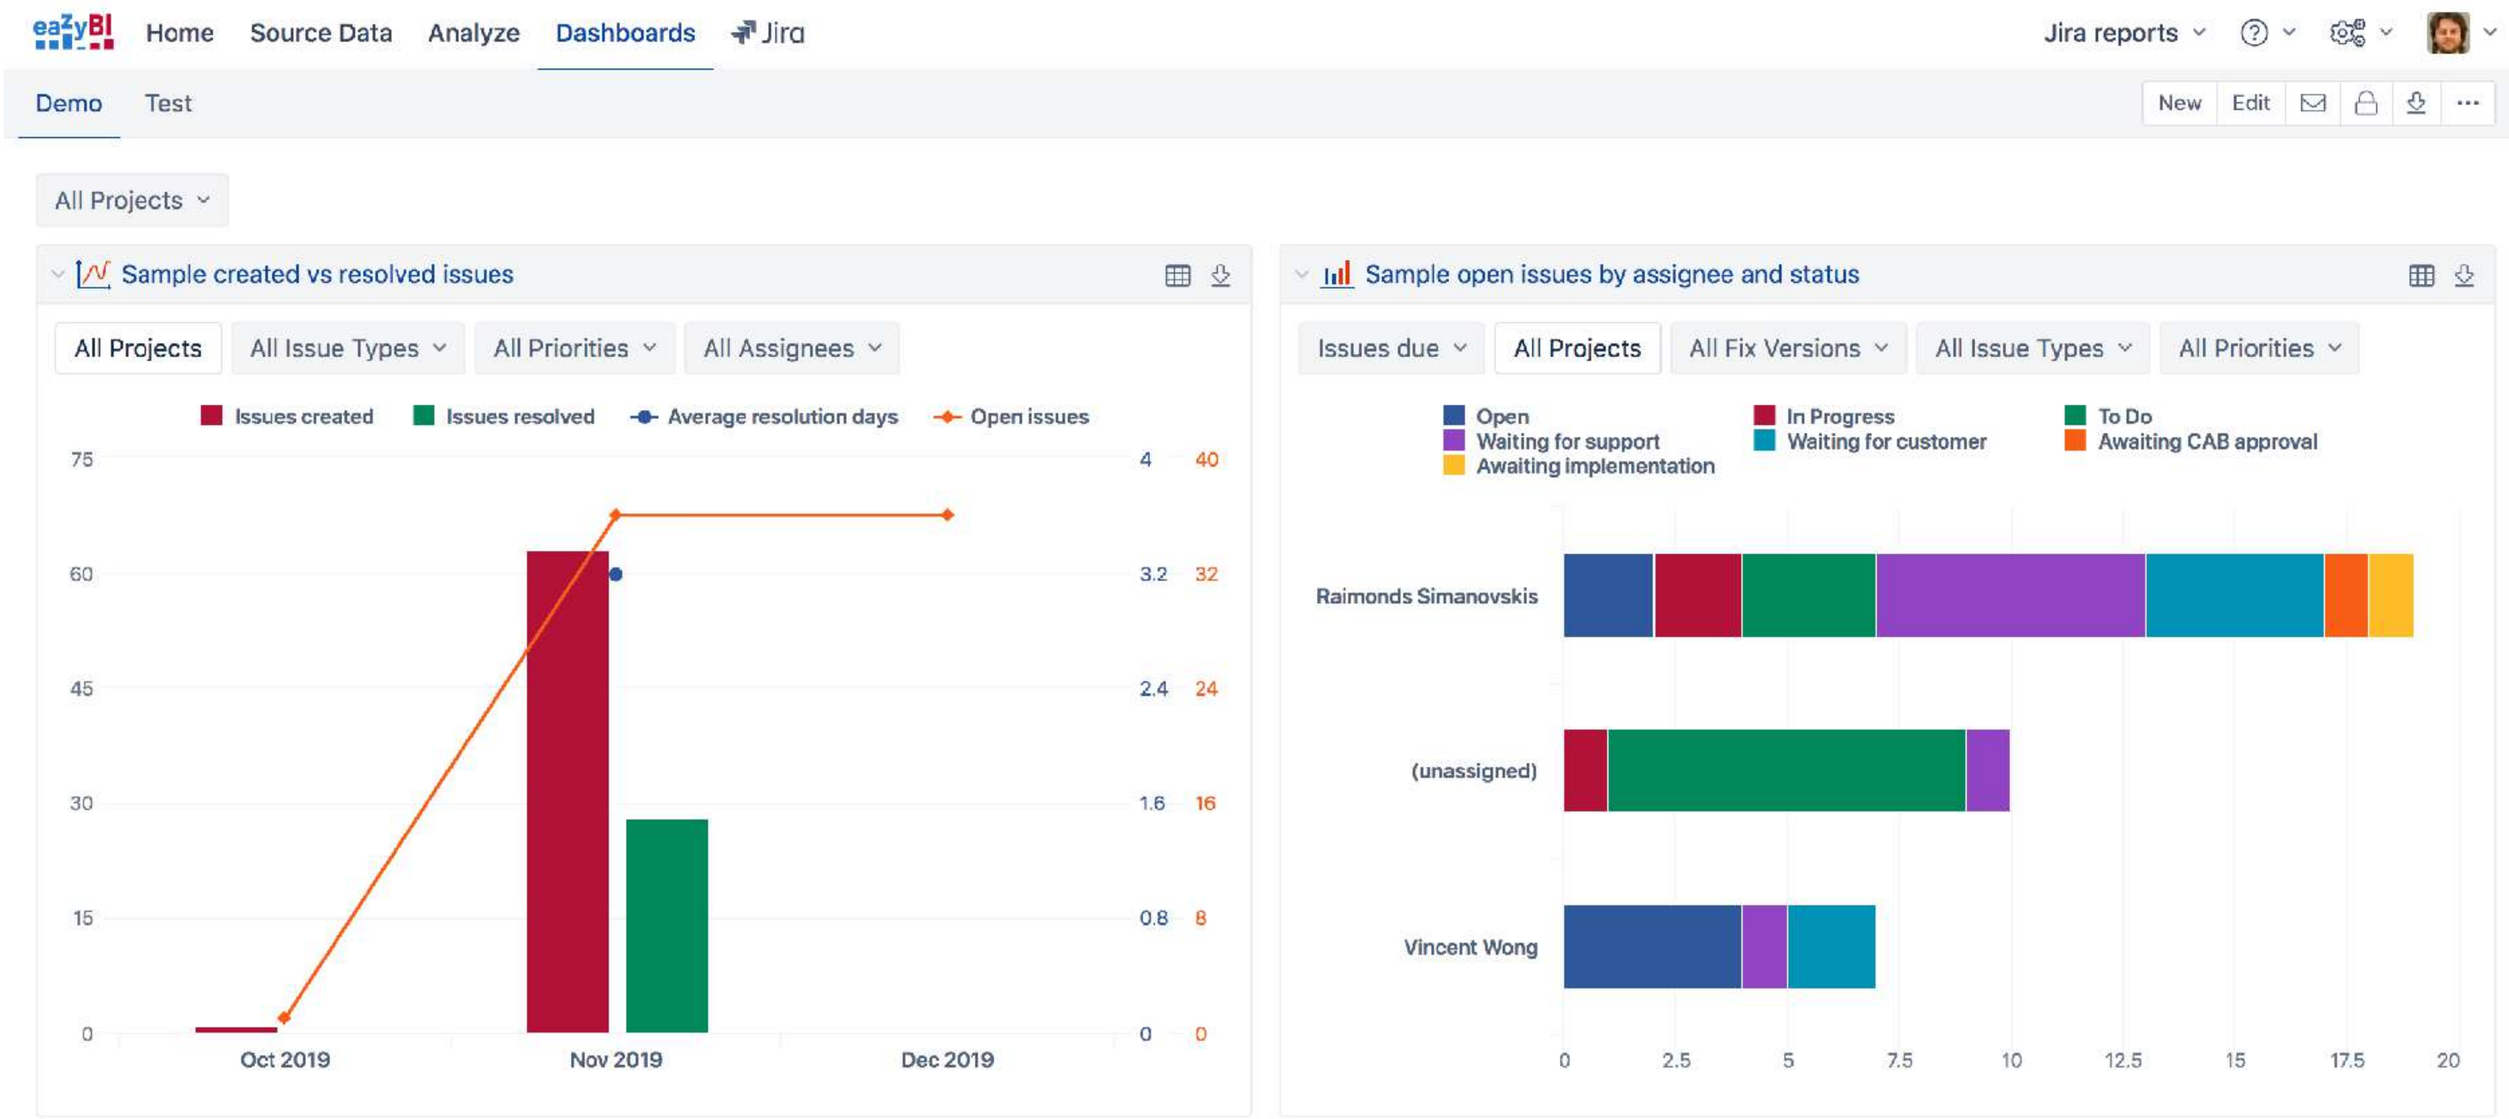
hackerone

eazyBI for Confluence 5.0 – 5.3

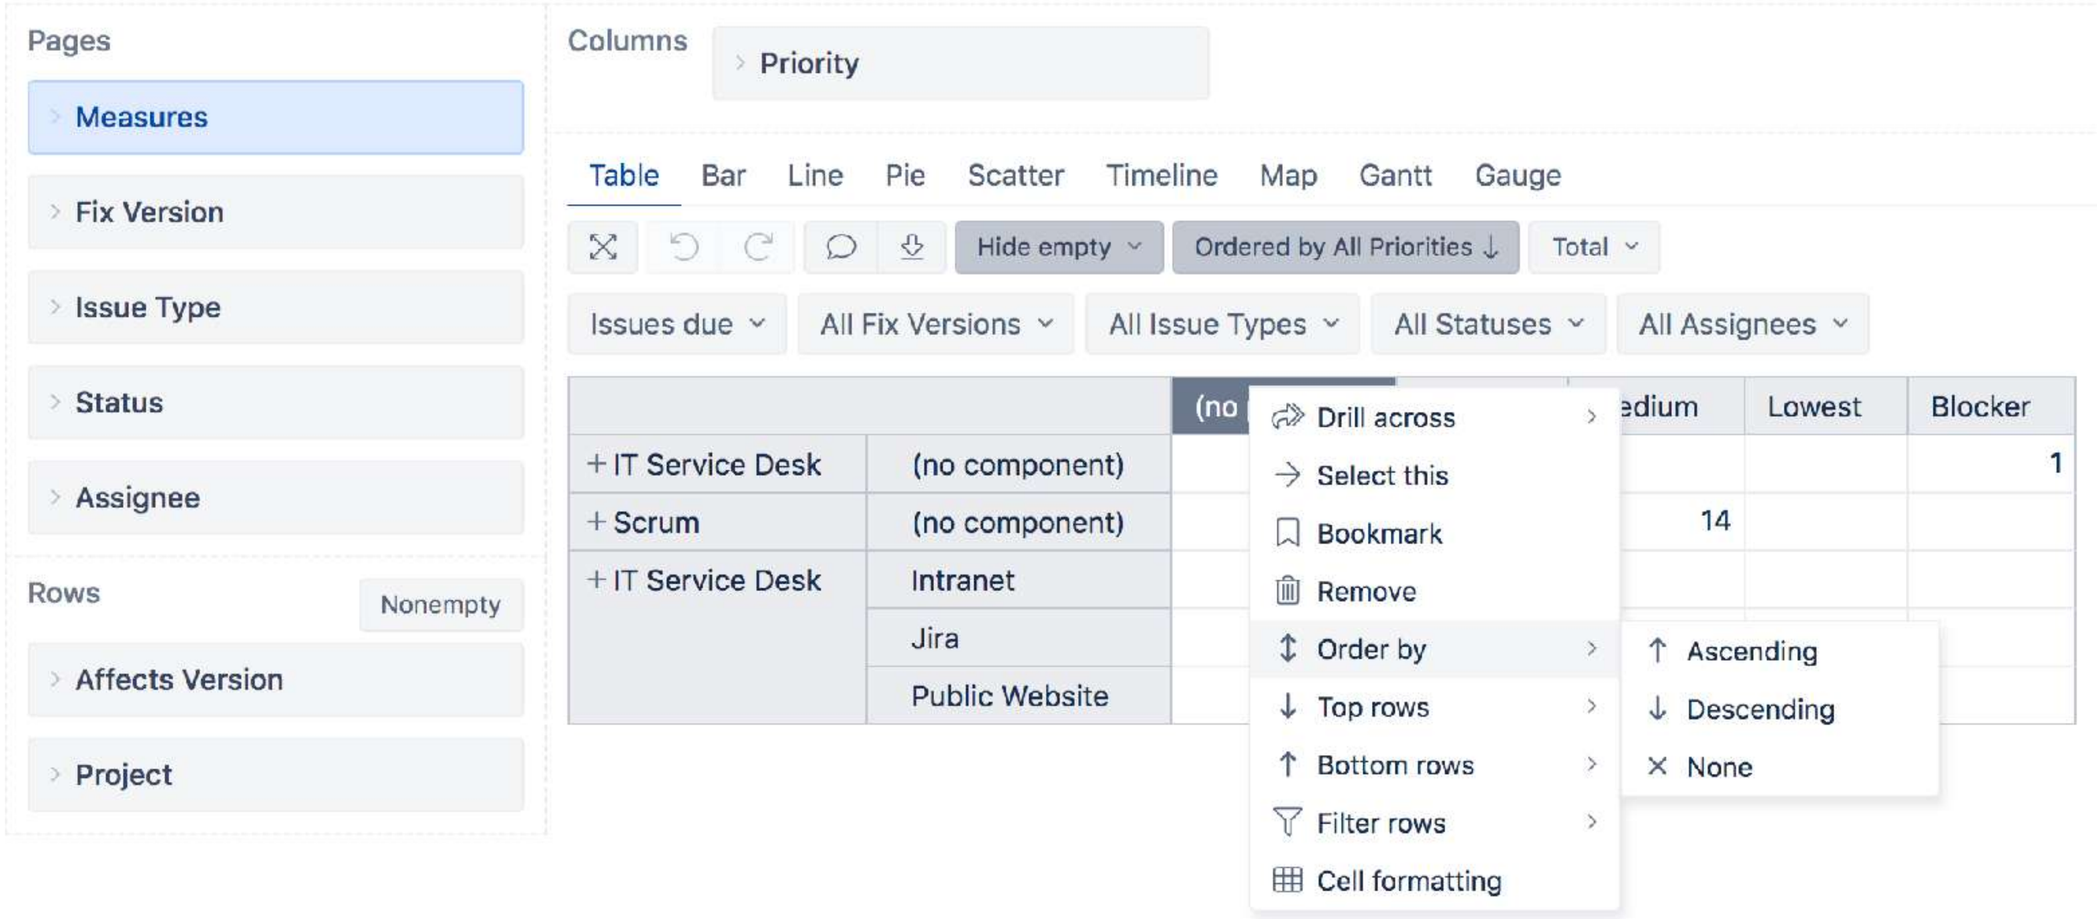
- Confluence content analytics
  - pages created, updated, page views, search queries
- Macros for publishing eazyBI reports and dashboards from Confluence and from Jira
  - also in Confluence page PDF exports
- Approved as Confluence Data Center compatible

Upcoming eazyBI Version 6

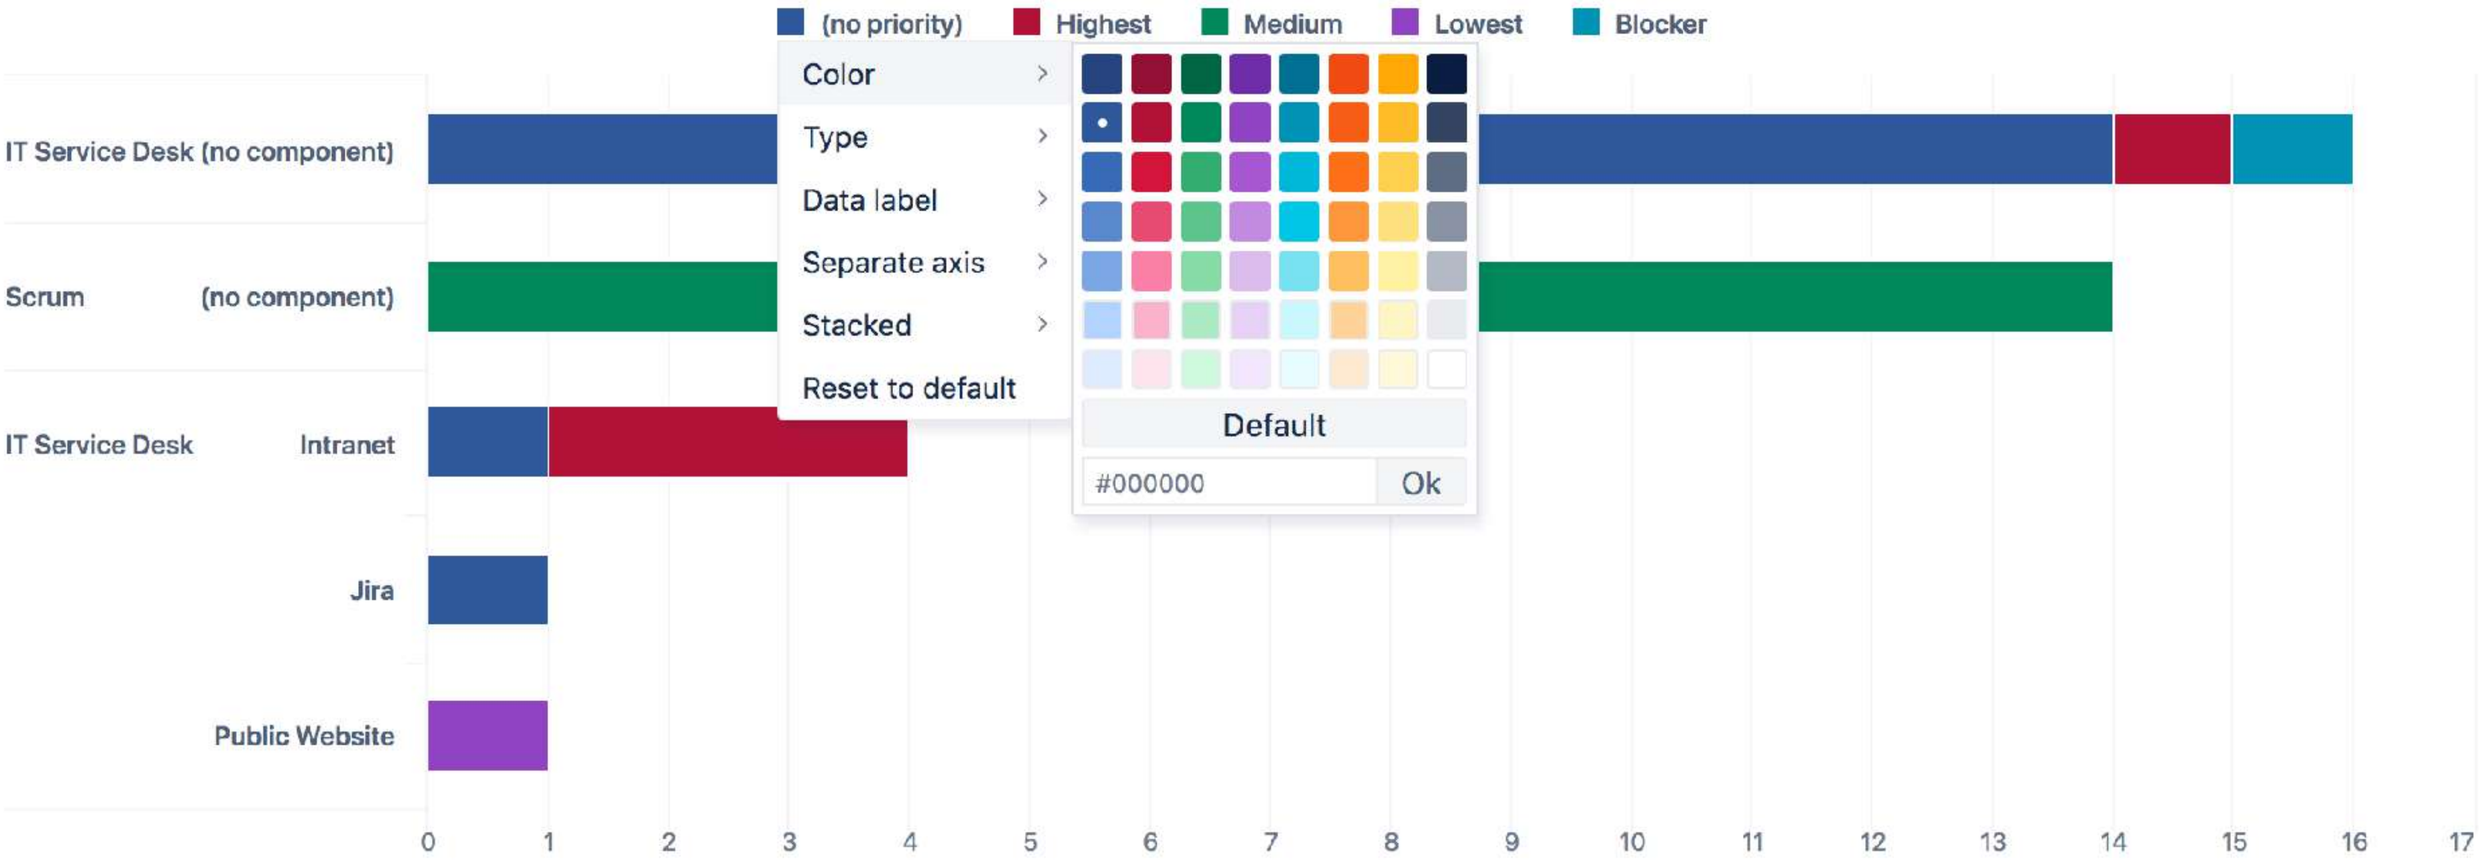
New User Interface



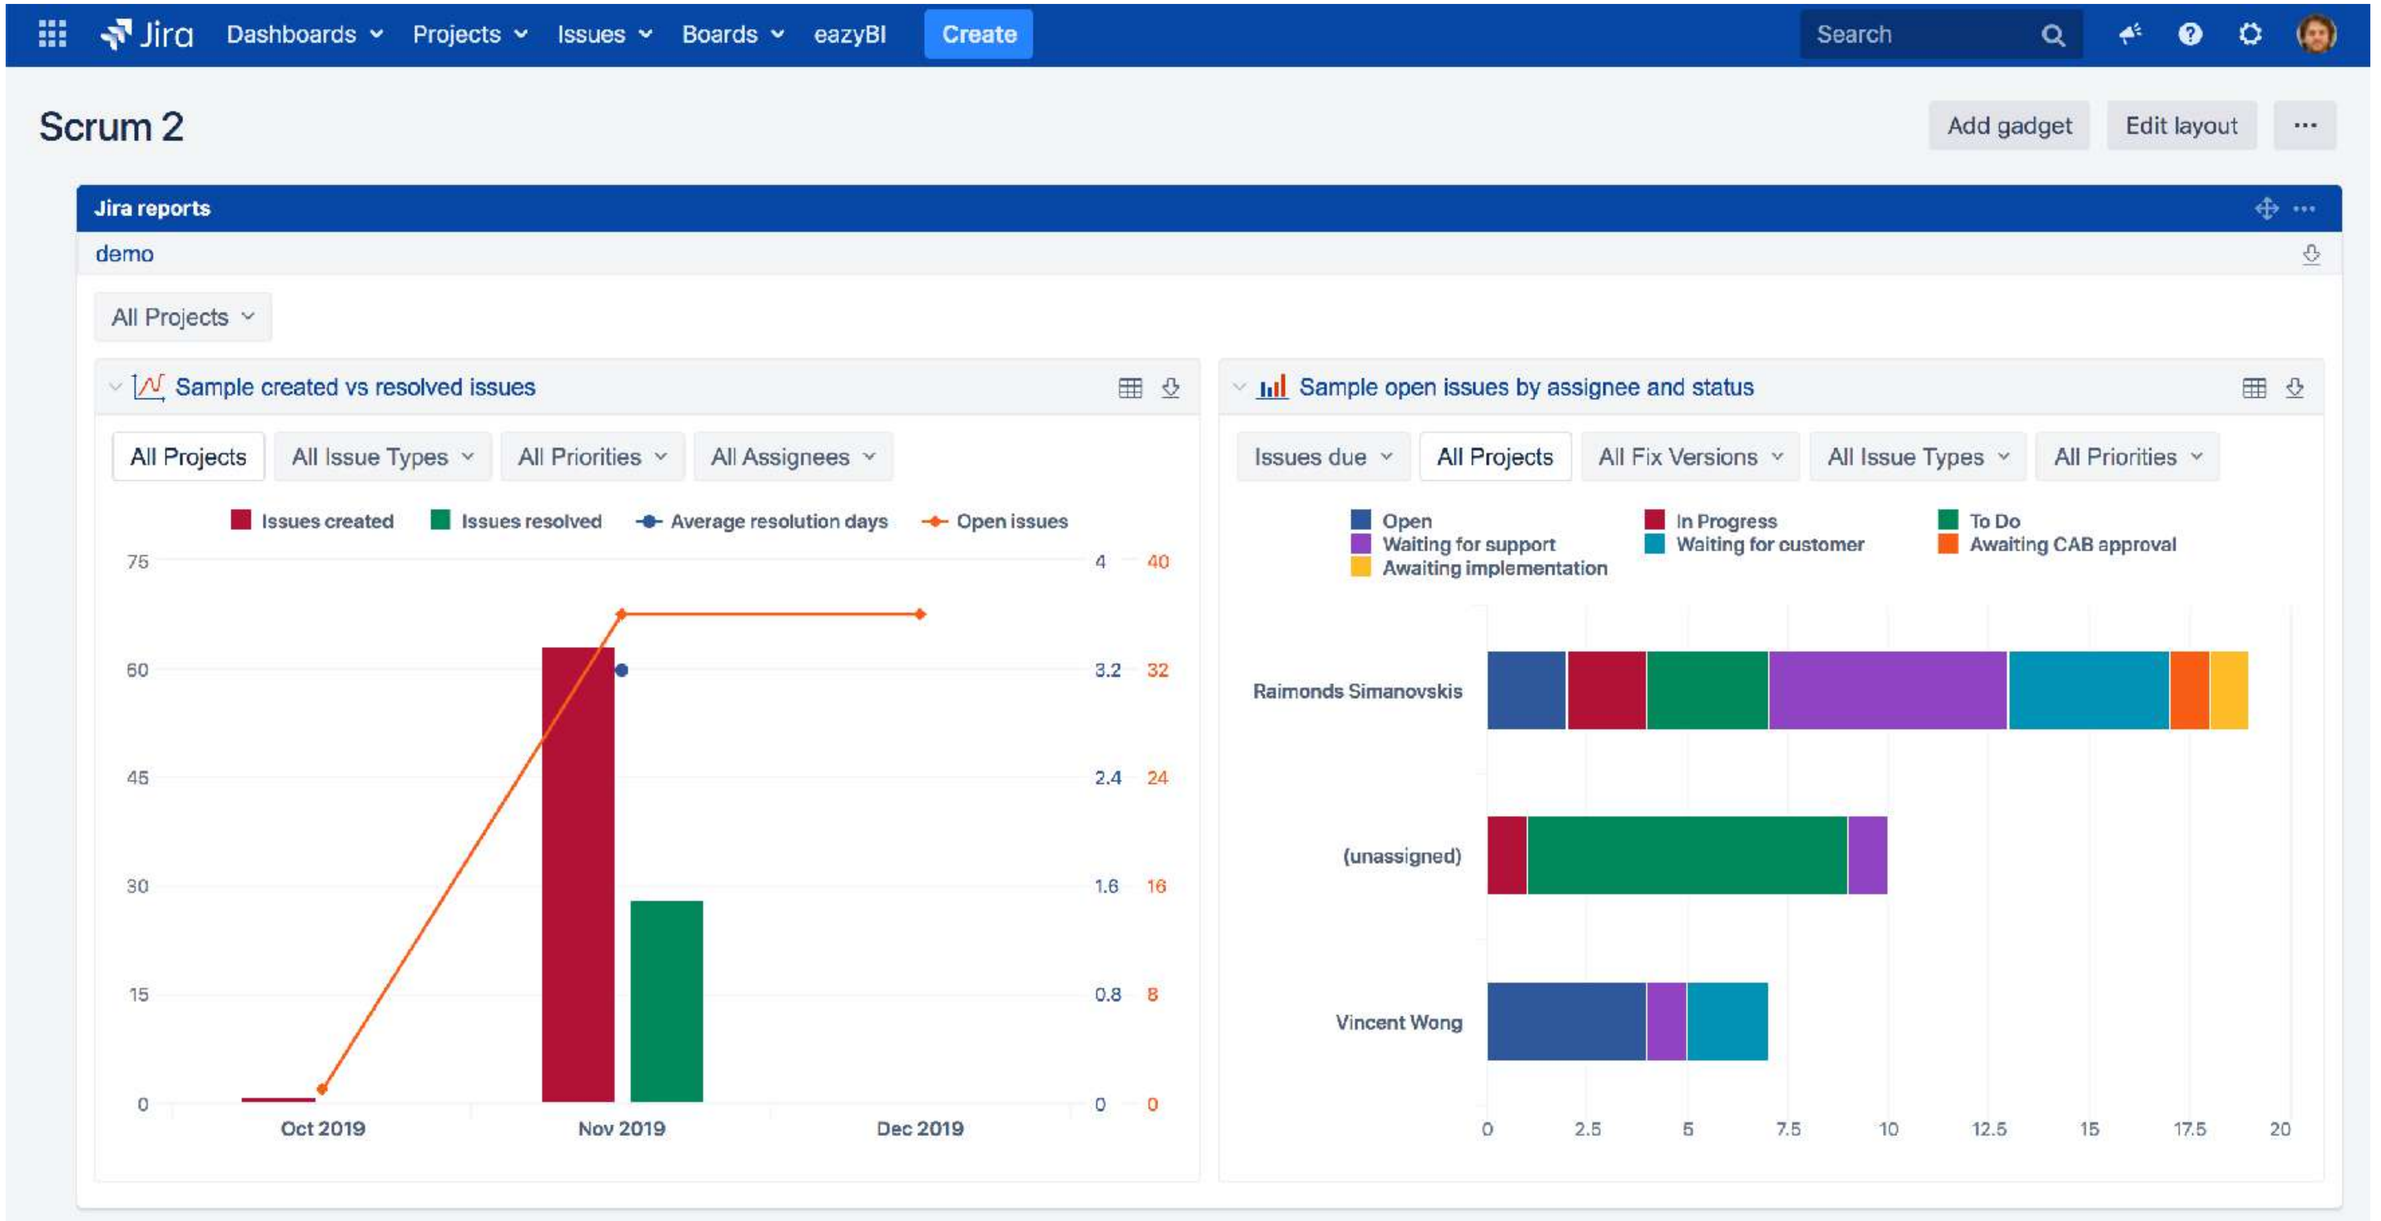
Lighter Look



More Standard Colors for Charts



Compatible with Atlassian Design



eazyBI for Jira Cloud and Confluence Cloud

Some Other Upcoming eazyBI 6 Features

- Week Day dimension
- Freeze row headers in wide tables
- More standard calculations
- Report specific calculated measures
- Larger sample reports library
- More Confluence content measures

More standard calculations
